

24 236 diagnosed HIV +

CURRENT SITUATION

In 2018:

- 1.275 new infections
- MSM > HET
- 87,5% male

2000 - 2015:

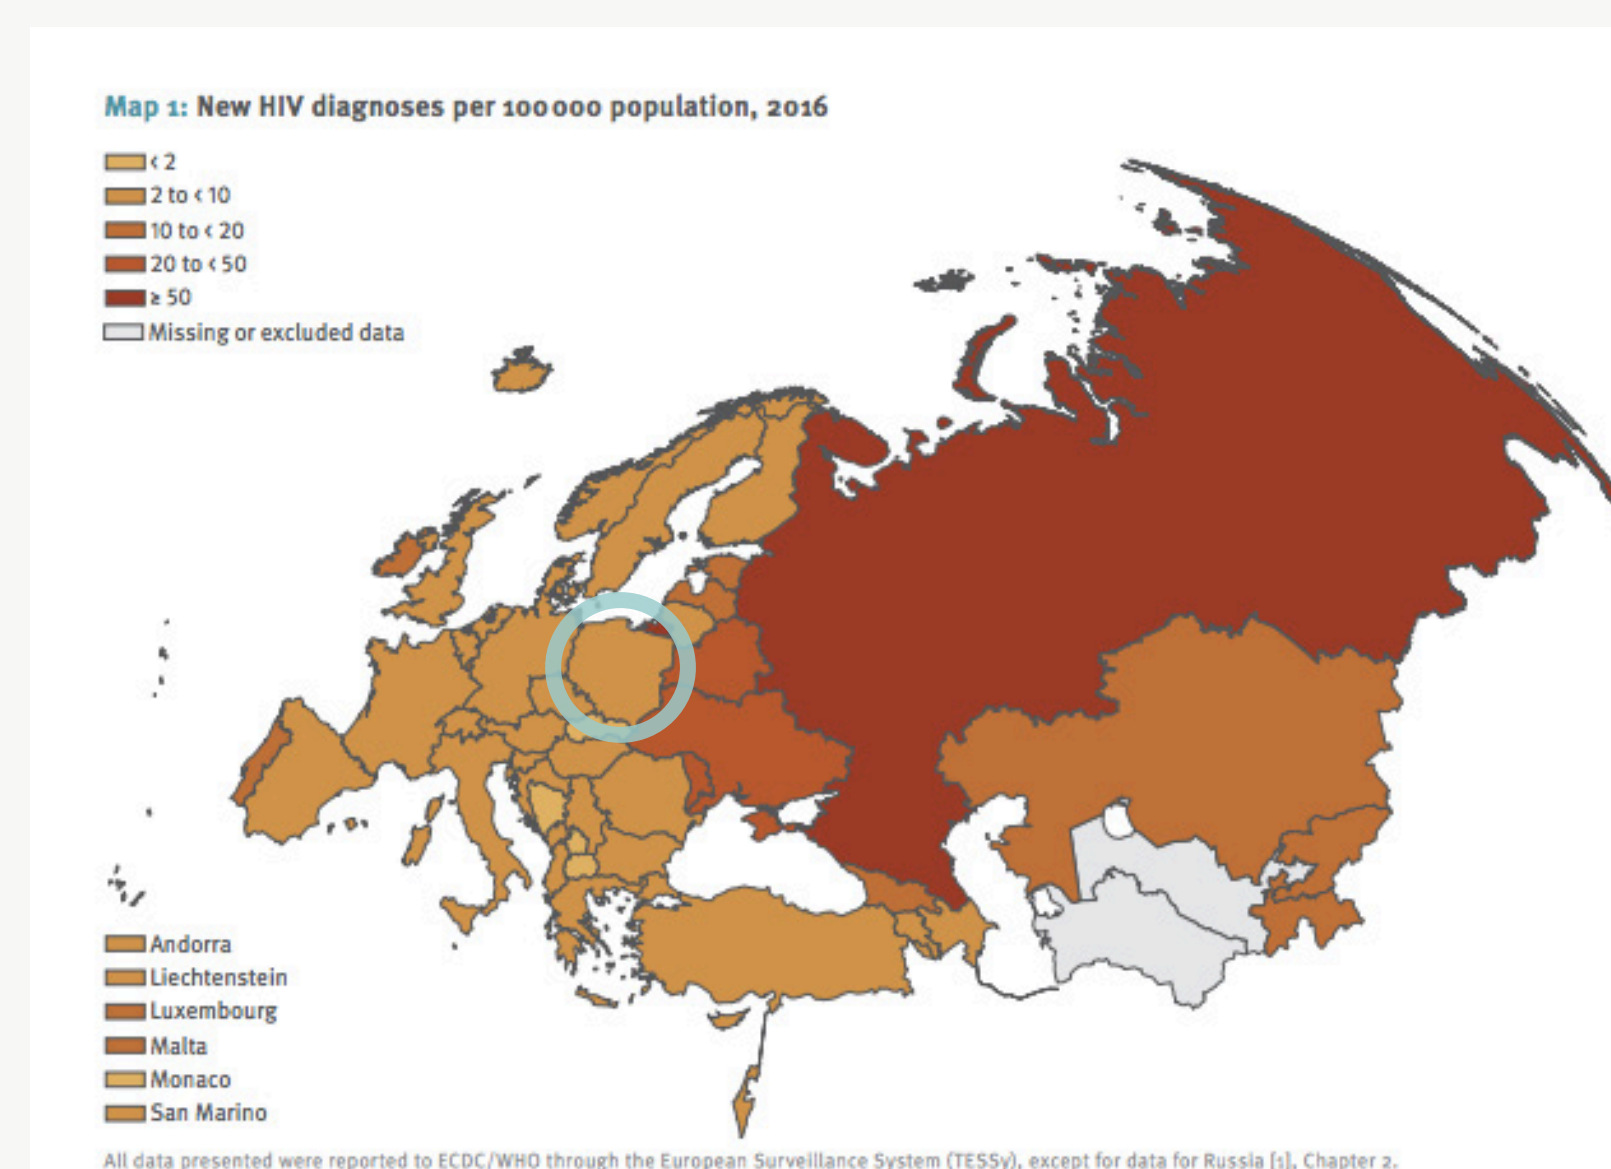

- Late presenters: 57,6%
- Advanced HIV disease: 35,6%

TREATMENT

Meeting the WHO 90% target:

- ARV treatment efficacy
- Free treatment (NOT PrEP nor PEP)
- National Programme for Preventing HIV Infections and Combating AIDS
- Annual Polish AIDS Society National Recommendations based on EACS Guidelines

PROPHYLAXIS

1800 people on PrEP

31 free testing points, but only:

- 9% of population tested
- 20% of pregnant women tested

Future goals:

- Reaching those unreachable
- Comorbidities/Ageing
- Better data collection

Acknowledgment:

This study received a travel grant from the Research Development Foundation in the Hospital for Infectious Diseases, Poland
